

Lasagna Gardening

Shawn Belt

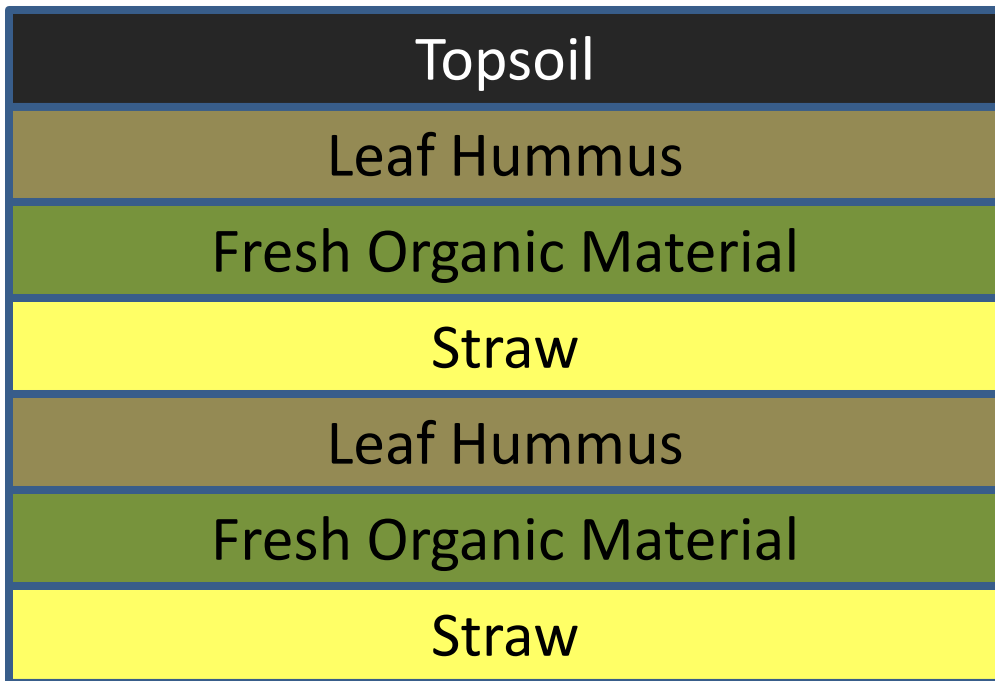

Green Corps Farm Manager

Lasagna Gardening is the production of growing beds using a layering technique that includes straw, fresh organic material, a soil amendment of your choice (leaf hummus), and topsoil. Finished lasagna beds are nutrient-rich environments for annual and perennial plantings. Think of lasagna gardening as composting in beds.

A good lasagna bed will have these layers

1. Mark Out Area

3.5 Feet

2. Lay Cardboard (if needed)

3. Lay Straw- 12 inches

Straw

4. Lay Organic Material- 6 inches

Fresh Organic Material

Straw

5. Lay Leaf Hummus-8 inches

Leaf Hummus

Fresh Organic Material

Straw

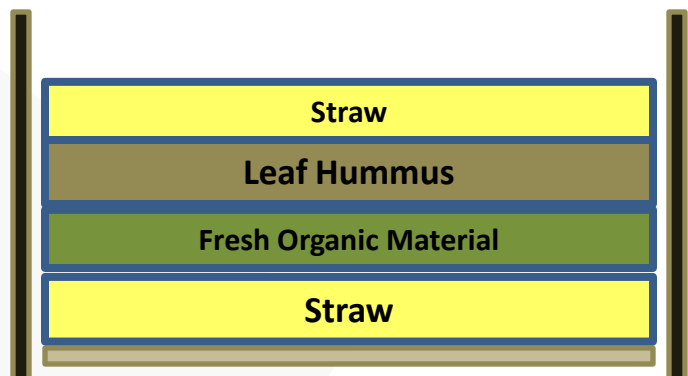

6. Add Natural Fertilizer in prescribed amounts

Re-Vita Compost Plus

A 100% natural, composted fertilizer of poultry manure, kelp, and humate, Re-Vita Compost Plus is one of the most complete fertilizers available. Contains a balanced source of nitrogen, phosphorus, and potash in a slow release form which feeds the plant throughout the season. The addition of kelp and humate provides a complex of trace minerals and bio-stimulants easily assimilated by plants. These substances enhance germination, root growth and overall health of the plant. **Re-Vita improves structure, water holding capacity and aeration of the soil. It also revitalizes the biological activity in the soil.** Re-Vita is in a uniform, granular form which is easy to use. Excellent for gardens, flowers, shrubs, trees, and field crops. For gardens apply 5 lbs. per 100 row ft. or 2 lbs. per 100 sq. ft.

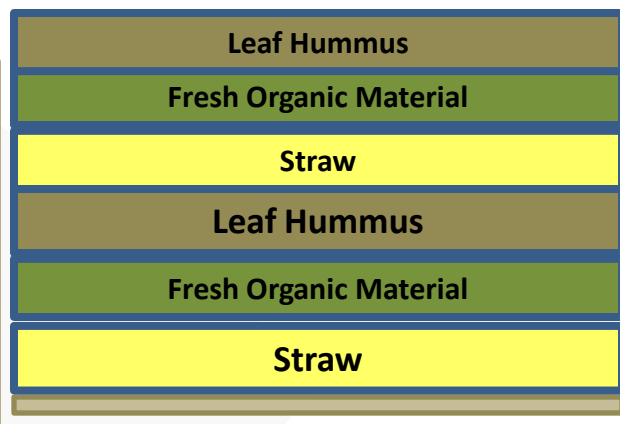

7. Lay Straw- 6 inches

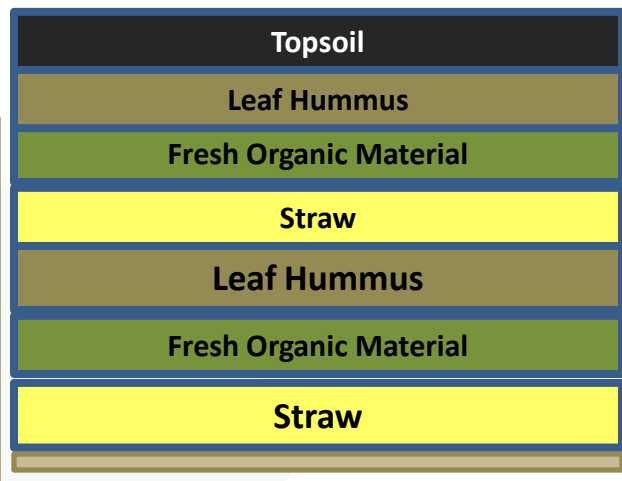

8. Lay Organic Material- 6 inches

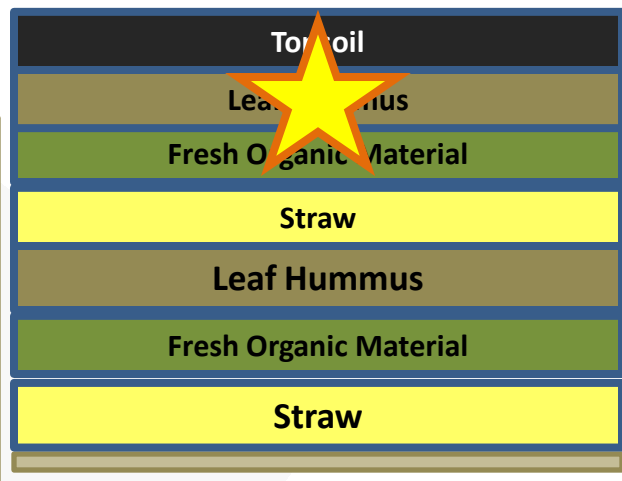

9. Lay Leaf Hummus-6 inches

10. Lay Topsoil- 6-8 inches

11. Add worms

12. Grow Amazing Plants
